Dear Sarah,

We are very grateful to the sixth form students at Collingwood College who raised £345.13 for Christopher's Smile. We really appreciate the continued support by Collingwood College for our charity.

We continue to fund research projects where we believe the greatest difference can be made to patients in the clinic and where current outcomes are especially poor. We are particularly interested in work on circulating tumour dna and csf (cerebral spinal fluid) for solid tumours and we would like to support implementation of work in these areas once the research has reached this point.

The support from Collingwood means a lot to us and we want to assure you that as always 100% of any donation will be used for childhood cancer research. We take nothing out. We have seen first-hand the effects cancer has on children both for those that do not survive their battle and for those that survive often with a legacy of post treatment issues. Your help enables more research into this terrible disease that is the biggest killer of children in the western world.

With many thanks again and best wishes
